1. In the application created in Spring Day 6 of User Registration, include the following validations:

Field	Validation
Username	Required and only alphabets
Password	Required with min length of 8 characters and atleast 1 special symbol
Gender	Required
Hobbies	Minimum 2 hobbies selected
preferredHolidayLocation	NO Validation
Age	Must be min 18 years of age
DateOfBirth	Must be less than the current date

Use the Validator interface to validate and then Hibernate Validations.

2. Write a Spring MVC application with JDBC with following features. Use the classes created during Java Assignment – Day 2.
   a. Register Customer & Apply Loan
   b. One customer should be allowed to apply for multiple loans.
   c. Search screen should allow search based on Customer Code/Loan ID.
   d. If we enter customer code details of customer as well as loans belonging to him should be displayed.
   e. If we enter loan id details of loan along with customer code and customer name should be displayed.

Important Points:

1. The UI for the Point 'a' is as created in JavaScript Assignment.
2. Implement Internationalization for the page designed in Point 'a'.
